Support for resolutions up to 4K Ultra HD 60Hz ensures the highest image quality, perfect for demanding graphical content in gaming setups, video editing or quad system control workstations. The additional support for High-Dynamic Range ensures video content can be seen with enhanced brightness, greater contrasts and a much wider colour gamut. The audio output ports on the main unit also allow users to connect headphones or speakers to add immersive 2CH audio and a microphone, pressing the Audio On/Off button on the front panel mutes these devices. These ports are not connected to the HDMI signal but to a built-in USB converter while an additional USB device such as a printer, scanner or hard drive can be connected to the additional USB port on the front panel.
