

ARTICONA is Bechtle's own brand of IT accessories for the modern workplace and stands for quality and reliability in everyday business.

LED Desk Lamp White

Article number: 4625142

The ARTICONA LED Desk Lamp white provides optimal lighting of your workplace and is silent, so that you can work productively and concentrated. Brightness and light temperature can be flexibly adjusted according to your needs via a touch control panel and the settings are saved thanks to the practical memory function. For example, it is advisable to choose a natural white for concentrated work. Cold white light also enhances concentration and is particularly suitable for tasks that require a lot of creativity and attention. Warm white light, on the other hand, has a more cosy and relaxing effect. The lamp is characterised by a particularly large, dimmable brightness spectrum and can be set to be particularly bright. With its modern white and simple design and with its diverse functions, the table lamp is the perfect companion for an efficient working day in the office. The desk lamp is also ideal for the desk at home: The orientation light can be used, which can be adjusted to three brightness levels, or the practical timer function can be activated, which switches the lamp off automatically after 45 minutes preventing forgetting to turn the lamp off. In that way the desk lamp helps you to save electricity apart which comes in addition to the lamp's high energy efficiency*. The desk lamp is fitted with an euro plug. If you want to use the lamp in a country with a different socket, we recommend using a country-specific adapter (not included).

Packing list:

- 1*LED desk lamp
- 1*user manual Certificate
- 1*power adapter (Euro)
